

Environmental Policy

The Alkath Group is committed to conducting its business in a manner that protects the environment, supports sustainable development, and demonstrates environmental responsibility, transparency and accountability. We recognise that effective environmental management is essential to our operations and we are dedicated to promoting a company-wide commitment to environmental management.

1. Our Commitment

To achieve this commitment, Alkath Group will:

- Comply with applicable environmental legislation, regulations, customer requirements, and other compliance obligations.
- Manage environmental aspects and impacts arising from our activities in accordance with applicable legal, customer and operational requirements.
- Promote the efficient use of energy, water, raw materials and other natural resources, and minimise waste wherever practicable.
- Take all practicable steps to protect the environment by preventing pollution, minimising greenhouse gas emissions, protecting biodiversity and natural ecosystems, and minimising other adverse environmental impacts.
- Consider environmental impacts throughout the life cycle of our products and services where Alkath Group has control or can reasonably influence outcomes.
- Educate and train our workers to improve environmental awareness, skills, and knowledge of environmental issues and practices.
- Pursue environmental initiatives that support Alkath Group's sustainability objectives and communicate, where appropriate, with interested parties on environmental matters.
- Establish, monitor, and review measurable environmental objectives and targets.
- Maintain and continually improve our environmental management system to enhance our environmental performance and achieve our environmental objectives.

2. Responsibilities

All workers, contractors, and other persons acting on behalf of Alkath Group are responsible for complying with this policy and supporting the achievement of our environmental objectives. Managers are responsible for implementing this policy within their areas of responsibility and ensuring appropriate environmental controls are maintained.
